- @apiSuccess {object} myResponse shows error status, message, http status code, result.
-
- @apiSuccessExample {object} Success-Response: { "error": false, "message": "All groupChats Listed", "status": 200, "data": [

```
  {
    "chatId": "IELO6EVjx",
    "modifiedOn": "2018-03-05T15:36:31.026Z",
    "createdOn": "2018-03-05T15:36:31.025Z",
    "message": "hello  rahul",
    "receiverId": "-E9zxTYA8",
    "receiverName": "Rahul parmar",
    "senderId": "-cA7DiYj5",
    "senderName": "rajeev parmar"
  },
]
}
```

POST localhost:3000/api/v1/users/signup

localhost:3000/api/v1/users/signup

api for signup

Example Request

Default

```
curl --request POST \
  --url http://localhost:3000/api/v1/users/signup
```

POST localhost:3000/api/v1/users/login

localhost:3000/api/v1/users/login

api for login

Example Request

Default

```
curl --request POST \
  --url http://localhost:3000/api/v1/users/login
```

POST localhost:3000/api/v1/users/logout

localhost:3000/api/v1/users/logout

api for logout

Example Request

Default
| ```
curl --request POST \
   --url http://localhost:3000/api/v1/users/logout
``` |

GET localhost:3000/api/v1/chatRoom/createRoom

localhost:3000/api/v1/chatRoom/createRoom

api fro create room

Example Request

Default
| ```
curl --request GET \
   --url http://localhost:3000/api/v1/chatRoom/createRoom
``` |

PUT localhost:3000/api/v1/chatRoom/editRoom/chatRoomID

localhost:3000/api/v1/chatRoom/editRoom/chatRoomID

api to edit chat room

Example Request

Default
| ```
curl --request PUT \
   --url http://localhost:3000/api/v1/chatRoom/editRoom/chatRoomID
``` |

POST localhost:3000/api/v1/chatRoom/createRoom/deleteRoom/chatRoomId

localhost:3000/api/v1/chatRoom/createRoom/deleteRoom/chatRoomId

api to delete chat room

Example Request

Default

```
curl --request POST \
    --url http://localhost:3000/api/v1/chatRoom/createRoom/deleteRoom/chatRoomId
```

GET localhost:3000/api/v1/chatRoom/listAll

localhost:3000/api/v1/chatRoom/listAll

api to get all rooms

Example Request

Default

```
curl --request GET \
    --url http://localhost:3000/api/v1/chatRoom/listAll
```

GET localhost:3000/api/v1/chat/user

localhost:3000/api/v1/chat/user

api to get user chat

Example Request

Default

```
curl --request GET \
   --url http://localhost:3000/api/v1/chat/user
```

GET localhost:3000/api/v1/chat/group

localhost:3000/api/v1/chat/group

api to get group chat

Example Request

Default

```
curl --request GET \
   --url http://localhost:3000/api/v1/chat/group
```
